

RECAP Instructions

1. Once the game is over you can press 'RECAP' to see the recap screen. Unless you have a bowler that hasn't established you can copy all that info on to the recap sheet.
If you do have an unestablished bowler do not fill out the handicap or total lines at the bottom. You can however fill out the scratch total and the totals to the right of each bowler. If your 'RECAP' button doesn't work please take the time to calculate the score, your league secretary will thank you.
2. Please circle absent bowlers names.
3. If you have a sub and you change the bowling lineup make a note that you did so. Please indicate what position your sub is bowling in either with an arrow or in a comment.
4. Place X's in the boxes under each game to indicate the winner (again unless you have an unestablished bowler).
5. Enter points won, points lost (unless you have an unestablished bowler).
6. If you change your bowling order please indicate that on the recap.
